EDUCATION

The University of Texas Rio Grande Valley - B.S. in Computer Science

3.88 GPA

Relevant Courses: *Data Structures & Algorithms, OOP (Java), Computer Organization & Assembly, Computer Networks, Database Design, Automata, Digital Systems I, SWE I & II, Discrete Math, Linear Algebra, Calculus II*

PROFESSIONAL EXPERIENCE

Professor Assistant (University of Texas Rio Grande Valley)

- Supported instruction for a class of **50+ students**, contributing to a **90% course passing rate** in **Computer Science II** and **Computer Networks**.
- Assisted in grading **100+ assignments** weekly and provided academic support during **walk-in tutoring** hours.

Web Developer (Freelance) (MiniAngel.lol) [🔗](#)

- Built a **web app** for users to **search, track, and share** Sonny Angels, serving **100 active users** with persistent data.
- **Collaborated** with the **client** using **Figma** and **Jira**, and built the stack using **React/Tailwind, Node.js/Express**, and **PostgreSQL/Supabase**.

PROJECTS

CineVault

- Collaborated in a **team of 4** to build **CineVault**, a movie web app with personalized recommendations (**recommender system**) using **Python, Pandas**, and **Scikit-Learn**.
- Enabled users to **search, track, and list** movies, with **React, Supabase**, and **Postgres** powering the frontend and backend.

TacMap [🔗](#)

- Built a **real-time** whiteboard app using **React/TailwindCSS** and a **Node.js + Socket.io** backend for **live annotations, live chatroom**, map uploads, and room creation.

Hackathon Winner - Frontera Hacks 2024, "First-Time Hackers" Category [🔗](#)

- Co-developed **Middle Man**, a platform for **business promotion**, using **React, Tailwind**, and **Node.js**.
- Leveraged **Google Gemini API** to detect and flag inappropriate content in user-submitted descriptions.

Healthcare Distributed Microservices Platform (End-to-End Cloud Deployment)

- Built a **patient management system** using **Spring Boot microservices** with **gRPC, Kafka**, and **JWT** authentication behind an **API Gateway**.
- Fully containerized and deployed using **Docker** and AWS-style **CloudFormation** on **LocalStack**.

SKILLS

Languages: JavaScript, Java, Python, Dart, C, C++, SQL, Bash/Shell

Frameworks & Technologies: React, TailwindCSS, WebSockets, Node.js, Spring Boot, Microservices, gRPC, Kafka, JWT, REST API, PostgreSQL, MySQL, Supabase

DevOps/Cloud and Collaboration Tools: Docker, AWS, Infrastructure as Code (IaC), CI/CD, Linux/Unix, Git, GitHub, Unit Testing, Figma, Jira, Agile
